## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 1-12 where not cancelled.

Claim 1-12 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 5/10/04.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by McMurray 3,581,212.

Regarding claim 13.

McMurray discloses a method for conditioning an AC power supply, comprising:

supplying a DC voltage or regulated AC voltage input to a step wave power converter (figure 8, 38);

transforming the DC voltage or regulated AC voltage input into a plurality of steps of the step wave AC waveform (figures 5-7); and pulse-width modulating (inherent in voltage regulator 38) the DC voltage or regulated AC voltage input while the input voltage is being transformed into a step of the output AC waveform.

***Allowable Subject Matter***

Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
